

Features:

- polycarbonate switch box for wall mounting
- displaying of operation modes via clear text display and signal lights
- automatic operation of one three-phase or mono-phase pump
- programmable starting delay and follow-up time
- visual and audible fault signal with potential-free outputs
- level control by means of dynamic pressure method, float switches or 4 - 20 mA interface for external sensor
- displaying of operating hours, power consumption and maintenance interval
- fault memory for last 64 faults

Application:

- automatic pump control

Product benefits:

- very comfortable control unit with simple control logic
- choice between pneumatic, floats and external sensor possible
- fault memory
- integrated audible and visual alarm
- potential-free contact for signal forwarding
