

Features:

- compact and corrosion-resistant sewage water submersible pump
- including floating tap and check valve
- fixed vertical float switch
- with built-in compressor
- connecting cable, 10 m long

Application:

- feeder pump for rainwater modules with long suction lines and bigger suction heights
- supply of service water

Scope of delivery:

- 10 meter connection cable

Product benefits:

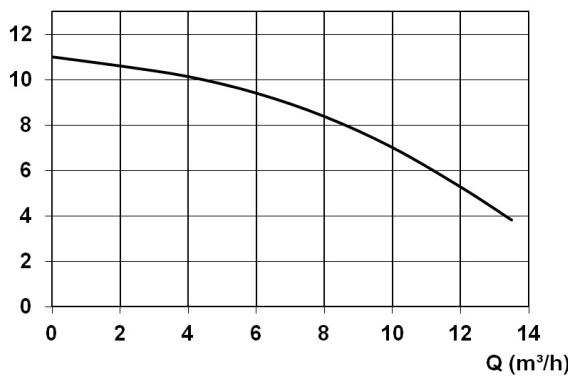

- versatile usage
- automatic operation with defined switch points by fixed, vertical float switch
- intake of the cleanest water by supplied floating intake
- LAB-LIP-SEAL system - the motor is protected by three lip seals

Technical data:

| Art.no. | Weight [kg] |
|---------|----------------|
| 19103 | 3,5 |

Characteristics:

H (m)

Example of installation:
