

## Features:

- Fully automatic pressure boosting system
- Speed controlled
- Base plate version
- Membrane pressure vessel approved for drinking water on the pressure side as a control vessel, flow through according to DIN 4807-5, with stopcock and drainage valve
- vertical high-pressure pumps with speed control
- Reliable operation due to hydraulic components made of stainless steel / brass
- Check valve
- Pressure gauge for pressure indication
- Electronic dry run protection
- Pressure sensor on both sides
- Vibration damping
- Electric motor, protection class IP55, efficiency class IE5 according to IEC 60034-30
- Error message contact per pump

# **Application:**

- Pressure increase
- Pumping of drinking water, process water, cooling water & liquids that do not chemically or mechanically attack the materials

## Scope of delivery:

- Pump with control
- Expansion tank
- Base plate for safe installation

#### Product benefits:

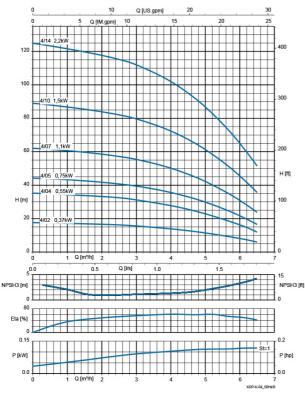

- Energy-efficient operation and constant pressure through speed control of the pump
- Suitable for drinking water through production under strict hygienic conditions
- Simple and fast commissioning due to ready-to-connect, pre-assembled and tested system
- Corrosion-resistant due to powder-coated materials and stainless steel
- Operational safety due to built-in dry-running protection
- Avoidance of damage to the piping system in the 3~400 V version through piping filling function
- Remote monitoring of the plant through connection to building control system
